DESCRIPTION

- In the HyFlex® 11-920 glove, Ansell incorporated its patented Ansell Grip Technology™. Microscopic channels in the glove coating guide away the oil resulting in a secure glove-to-surface contact. This allows the wearer to handle small and medium-sized components lightly coated with oil or lubricant in all confidence.
- Protects skin from oil contamination.
- Incorporating all the essential features of the Ansell HyFlex® range, users appreciate the outstanding fit, comfort and dryness, as well as the glove's excellent dexterity and tactility.

REMARKS

- Antistatic according to EN1149
- Fit for special purpose

FEATURED TECHNOLOGY

Ansell Grip

A revolutionary combination of excellent grip and strong oil-repellence

PRIMARY INDUSTRIES

IDEAL APPLICATIONS

- Assembly and finishing
- Quality control
- Metal fabrication
- Assembly of white goods
- Light metal fabrication and handling
- General site & factory maintenance

EN 388
3131
