

## Hakko FX-890 (China 90) soldering station

### Features:

1. Big Display
2. Three operating buttons for improved operation
3. Detachable control panel, the host and the panel can be placed in different locations with more flexible installation for usage (the host and the panel are connected with connecting wire)
4. Quick recuperation
5. Design of eliminating static

### Function:

1. Password-based lockout capability
2. Preset temperature mode
3. Hibernation
4. Temperature correction
5. Low temperature alarm

### Standard:

1. Detachable control panel: need another panel wire
2. Three operating buttons: UP / DOWN / ENTER
3. Outside size: 114(W) x 134(D) x 140(H)

### Soldering iron

1. Power: About 110W
2. Impedance between nozzle and ground: below 2 $\Omega$
3. Potential difference between nozzle and ground: below 2mV
4. Temperature stabilization: +/-5 $\text{^\circ}$
5. Nozzle: Split-type
6. Heater: Integrated heater and heating pipe
7. Standard nozzle: T32-B
