

Power UP reset of 7931 and 7921 Counters

If it is necessary to perform a “Power Up” reset follow the instructions below:

- 1) Switch off power
- 2) Press the PROG key and digit 5 key (keep both keys pressed)

- 3) Keep both keys pressed, switch power on (keep keys pressed for 15 seconds).
- 4) The memory should now be cleared to default values and settings. Re-program unit with customer configuration
