

RS Red PVC glove

ENGLISH

A cotton interlock liner with a full PVC coating offering good resistance to abrasion and tear hazards. The PVC red glove is still popular to this day offering no-nonsense protection from mechanical hazards. The smooth PVC coating has good insulating properties and is anatomically shaped and flexible, minimising hand fatigue. The cotton interlock liner keeps the hands cool and comfortable, and the knitted wrist ensures a secure fit and keeps the hands free from dust and dirt. With good abrasion and tear resistance, the red PVC glove is extremely durable and has a long life expectancy.
