RS Pro Liquid Bottle Adhesive Debonder For Use With Rigid Plastic Acrylic

Product Details

Rigid Plastics (Acrylic) Bonding

A range of 3 versatile adhesives for the fabrication/manufacture of signs & point of sale (POP) displays when using acrylics, polycarbonates, high impact polystyrenes and PETG. The RS IGA range offers these 3 solvented adhesives in handy 250ml sizes to minimise wastage in smaller applications:

AB-1 – 1 part (single part) cement formulated to provide excellent bonding of small lap and butt joints on cast acrylics. It is also suitable for polycarbonate, high impact polystyrene and PETG and offers small gap filling qualities.

AB-2 – 2 part kit formulated to provide excellent bonding of all types of joints on the plastics mentioned above where an external exposure stronger bond is required.

AB-3 – 1 part (single part) cement formulated to provide excellent bonding of small lap and butt joints on extruded acrylics, polycarbonates, high impact polystyrenes and PETG. It will also give good results on cast acrylics. This water thin viscosity adhesive is ideal for use in by capillary action.

Pre-bond 1 – Solvent based cleaner in 250ml screw top can designed to clean & degrease the surfaces prior to bonding.

Liquid Adhesives
