

1/3" Vario Lens 5-50 mm DC Aperture

Art. no. TV8573

Page 1 of 1

- Auto iris lens
- Focal length 5.0 - 50.0 mm
- Aperture: F1.3
- Horizontal viewing angle: 52.0° - 6.0°

The lens is a very important component of your camera. It regulates the incidence of light on the camera's CCD and thus ensures an optimal exposure of your pictures. All lenses have a standard mounting thread. You can easily mount CS-Mount lenses on any camera. The aspheric lenses ensure especially high-quality pictures and prevent poor focusing at the edges. The incidence of light through the iris is controlled by the camera's auto-iris function. The lens is connected to the camera with a DC plug. The distinctive features of these lenses are a different viewing angle and a different focal length. (The greater the focal length, the narrower the viewing angle and the nearer you can zoom in on the image.)

Technical Data:

Dimensions	(HxD) 58.0x43.5 mm
Aspherically ground	Ja
Aperture	F 1.3
Horizontal angle	52,0 - 6,0 °
Width	43.5 mm
Focal length	5,0 - 50,0 mm

Format	1/3
Thread	CS
Height	58 mm
Compatible with IR light	Nein
Iris	Auto-Iris
Net weight	0.125 kg
