

Silicon RF Switching Diode

- For band switching in TV/VTR tuners and mobile applications
- Very low forward resistance (typ. 0.45Ω @ 3 mA)
- Small capacitance
- Pb-free (RoHS compliant) package
- Qualified according AEC Q101

Cathode marking
Laser marking

The figure contains three technical drawings of cathode marking components:

- Standard:** A top-down view of a rectangular component with a width of 4 and a height of 8. It features two circular cathode markings. Dimensions include 1.33 and 1.96 for internal features, and 0.4 and 0.93 for the bottom edge. A label "Cathode marking" points to one of the circles.
- Reel with 2 mm Pitch:** A top-down view of a component with a width of 2. It also features two circular cathode markings. A label "Cathode marking" points to one of the circles.
- Side View:** A cross-sectional view showing a component with a thickness of 0.2 and a base height of 0.66.

Package Outline
