RS Pro Proximity Switch, Flush, 500mA, 50V dc, 15.2 x 23 x 36mm

Product Details

Flush Mount Alarm Switch

Cable type or terminal type flush mount switches. Cable type comes fitted with 300mm long cable. Proximity switches primarily designed for discrete protection of doors and windows. The switches are of moulded construction incorporating a N/O SPST magnetically operated reed switch. The permanent actuating magnet is also of moulded construction to facilitate easy fixing. All switches have a separate tamper loop or terminals for maximum security as described in BS 4737.

Set includes magnet and proximity switch
