

AUTOMATION & CONTROL

### TT230SM Thermal Transfer Printer

The TT230SM thermal transfer printer is the next generation of printer available for small-to-medium volume users looking for an easy-to-operate and efficient printer. The TT230SM prints to a wide variety of materials, including all of HellermannTyton labels and ShrinkTrak. The TT230SM is also Ethernet ready, which gives the user the option of placing the unit away from the host computer. The TT230SM printer kit comes complete with a label caddy, hard shell case, TagPrint™ Pro labeling software and the TT1000UTSM ribbon.

- ▶ 300 dpi Print Head
- ▶ Print Speed Up to 3" per Second
- ▶ 2 Mb Flash 8 Mb DRAM
- ▶ Adjustable Gap Sensor

### Sport Printer

HellermannTyton introduces the newest innovation in portable labeling. The SPORT printer offers the convenient and immediate flexibility to generate or edit labels as needed for an installation.

The SPORT hand held printer is not only an efficient tool for creating solar installation labels and control panel markings at a job site, it also offers the added benefit of being pre-loaded with the current label templates as mandated by the National Electrical Code (NEC), International Fire Code (IFC) and Authority Having Jurisdiction (AHJ). And, the existing templates stored in the SPORT printer can be modified to meet specific local code requirements. Additionally, a large list of electrical symbols and graphics come with the SPORT printer and can be placed and sized easily on the label design.

Standard and reflective label materials (and the printing ribbons) are available with the SPORT printer, and in a variety of colors. HellermannTyton's pre-printed labels are manufactured based on the parameters outlined in Section 690 of the NEC using ultraviolet (UV) resistant ink, permanent acrylic adhesive, and a base material intended to endure harsh environmental elements. These labels meet the governing requirements for durability, color, text height and visibility and can be applied to most surfaces.

### TagPrint™ Pro 3.0

TagPrint™ Pro 3.0 is a new and updated version of TagPrint™ Pro 2.0. TagPrint™ Pro 3.0 is designed to work on the newer operating systems like Windows 7, Vista and XP as well as future operating systems.

#### System Requirements:

- ▶ TagPrint™ Pro Standalone/TagPrint™ Pro Client
- ▶ PC Running Microsoft Windows XP SP3, Vista SP1 or Later, Windows 7
- ▶ .NET Framework 4
- ▶ 512 MB RAM (XP SP3)
- ▶ 1.0 GB RAM (Vista/Windows 7)
- ▶ 500 MB Available Hard Disk Space

#### TagPrint™ Pro Server:

- ▶ PC Running Microsoft Windows 7, Windows Server 2008
- ▶ .NET Framework 4
- ▶ Microsoft SQL Server Express Edition 2008
- ▶ 1.0 GB RAM
- ▶ 500 MB Available Hard Disk Space

The advanced feature set of this software is its easy navigation and control. Additionally, as an update to 2.0, it offers several powerful capabilities which include Network user and Network printer compatibility, auto sizing barcodes, powerful import utilities and the ability to have multiple templates and databases open at the same time.

What-You-See-Is-What-You-Get (WYSIWYG) label creation displays a label on the screen exactly as it will appear in print. Open TagPrint™ Pro 2.0 label templates and data tables in the new TagPrint™ Pro 3.0. Automatically converts your label size database from TagPrint™ Pro 2.0 to TagPrint™ Pro 3.0 and search for the latest updates.

TagPrint™ Pro can print to nearly any dot matrix, laser, ink jet or thermal transfer printer with a valid 32 bit or 64 bit windows driver. Setting up the preferences for a label takes only a couple of minutes, plus all of HellermannTyton label products have been predefined for immediate use.
