Datasheet

Slide Nut For Use With KM6-II Sub Rack System, Tapped Strip

RS Stock number 1089616

Features

KM6-II Subrack Accessories

TAPPED STRIPS

Tapped M2,5 on a pitch of 1HP, these strips are used for securing front panels, backplanes, or as an option for chassis plates.

As an alternative to tapped strips, a slide nut suitable for use in front extrusions can only be used where a small number of locations are required.
