Cleanroom Mop Frame Head

DESCRIPTION

Exclusive swivel Mop Frame, made of high-grade stainless steel, can be maneuvered onto floors, walls, ceilings, baseboards and confined areas such as corners or stairs where conventional string mops are notoriously inefficient. Low profiled mop frame for easy and efficient cleaning under fixtures or other hard to reach surfaces. Also permits mopping in an "S" motion, collecting solid particles during use. The Mop Frame delivers continual surface contact at any angle and is accurately balanced and non-flipping. Swivel also locks into any position by tightening wing-nut located on mop frame. Changing mop and sponge heads is a clean and easy operation. A quick squeeze releases the frame-locking mechanism, enabling contaminated mop or sponge head to be replaced. All systems complete with Mop Frame and Polymer Adjustable Handle.

Dimensions: 15½" length x 3⅞" width x 5¾" height
